International Women's Day

Date:-8th March 2019

Gender issues include all aspects and concerns related to women's and men's lives and situations in society, the way they interrelate, their differences in access to and use of resources, their activities, and how they react to changes, interventions, and policies. Every year our college organizes a program on Gender Issues on International Women's Day, on 8th March. This year on Friday 8th March 2019 International Women's Day was celebrated.

Dr. Jayashree Upadhye, Principal of the college was a speaker for the day. She spoke about the 'Women in the 21st Century'. She said, 'Women are an integral part of human society. But for a woman, there could not have been any man. She is the mother of mankind. Despite holding such an important and unquestionable position, the role of women has been defined by men over millennia.'

Further, she said that events on earth demand the emergence of the feminine essence of Love all around. In the 21st century, women do not need to look at the historical injustices done to them. It is time to put all that behind her and look forward to her empowered role in this 'Aquarian age.' Women today need not look anywhere for a perfect role model. They need to look within and listen to their intuition, to take the right action at the right time.

YEAR 2018-2019

She said that some of you must be experiencing doubts. 'I do not have so much courage.' You do not need to be Rani Laxmi Bai to bring about this change. All you need to do is find your voice. All you need to do is spread unconditional love and compassion. Just take that first step in whichever way you can. Use the power of tears, use the power of anger, and use the power of words.

The program ended with a vote of thanks by Mr. Somnath Swami, SDO of the college.

FEMININE HYGIENE

Date:-27th September 2022

Menstruation and menstrual practices are still clouded by taboos and socio-cultural restrictions resulting in adolescent girls remaining ignorant of the scientific facts and hygienic health practices, which sometimes result in adverse health outcomes.

Menstruation is a major part of life for millions of young girls and women worldwide. On average, a woman will menstruate for 3,000 days during her lifetime. However, the needs and challenges faced by many young women and girls as they struggle to manage their menstrual hygiene are largely ignored, especially in developing countries. This situation persists despite new developments in the hygiene and sanitation sector in recent years.

An awareness program on "feminine hygiene" was conducted on 27th September 2022 by the National Service Scheme Department of the Asian College of Science & Commerce, in collaboration with "Poona Serological Blood Bank".

The program ended with the distribution of sanitary pads and wet wipes to all the participants along with the housekeeping staff. The objective of the program was to enhance the knowledge regarding menstrual hygiene and increase the awareness among the students and the faculty members about menstrual hygiene.

Around 80 students of the Asian College of Science & Commerce participated in the program along with staff. The program ended with the distribution of sanitary pads and wet wipes to all the participants along with the housekeeping staff. The event was a grand success, and everyone appreciated the opportunity and was aware of menstrual hygiene.
